Dear Parents/Guardians:

Below is a brief update on the library:

While the library has been closed, background environmental testing was performed on the air, books and shelving in the library. All samples came back acceptable. Due to the leak in the HVAC system it is recommended that the flooring materials be replaced.

During spring break our custodial team will be moving all the books to the old girls gym. Once the move is complete, students will be able to take out books as needed. Once the library is stripped, it will be painted and a tile floor will be installed.

Regards,

J.R. Giacchi
Superintendent
